- Greater control of procedures and activities throughout Inspection bodies.
- Savings in terms of time and money due to decrease or removal of re–inspection / re–work etc.
- Insurer provides lower premium to accredited organizations.

Auditing Services

The ISO standards emphasize the importance of audits as a management tool for monitoring and verifying the effective implementation of an organizations' management system, be it Quality, Environmental, Occupational Health and Safety, or information security management standard, Food safety management system, HACCP or any other ISO Standards.

We are approved vendor assessment auditing partners for most the international organizations, we can provide unbiased audits for vendor prequalification,
supplier assessment, project compliance audits, internal audits, gap assessment audits, etc.

Our Auditing Services encompass the following types of audits:

Internal Audit

Organizations certified to an ISO Standard, or in the process of certification, are required to conduct internal audits at periodic intervals. Internal audits can be conducted by employees internal to the organization, however, they can also be "outsourced" – to a competent organization like ABS.

Gap Audit

The purpose of the Gap Analysis or Gap Assessment is to find the gaps between an organization's management system and the ISO criteria they are aiming to conform with or certify to. The results of the Gap Analysis should outline, clause by clause, what requirements of the defined criteria are not being met or cannot be verified as being fulfilled; and what needs to be completed in order to meet those requirements.

Process Audit

Process audits seek to improve selected processes by finding out how they perform against defined criteria.One of the benefits is the intense focus on the selected processes. This means the Auditor may spend one, or more days on a single process, reviewing all aspects of it, from top to bottom, within the defined criteria. Such an exercise is bound to find several opportunities for improving the process in a significant way.

Product Audit

Product Audits evaluate actual product, product family, parts, or product
components against a certain specification, which is the criteria for the audit. Product Audits seek to find out if the product meets the exact requirements called out in the criteria used, or if the product performs as expected. Those requirements can be self-imposed, customer driven, governmental, or industry requirements

Supplier Audit

A Supplier/Vendor Audit seeks to verify physically or on-site at the supplier's premises that they are complying with certain defined criteria. This audits provide certainty that the Supplier/Vendor has the capability to provide products and/or services to your organization, that meet your own Quality, Environmental, Safety, Information Security, On-Time Delivery, or other requirements or criteria as
applicable.

"Management is doing things right, leadership is doingthe right things"
"ISO Management services made easy"

Outsourced Management system consultation & Auditing Services

ISO Standards are a tried and tested way to work more efficiently and effectively. They help organizations to improve their performance, reduce their risk and help them be more sustainable.

ISO Mgt. System Care Services is a professional outsourcing service where We work with you to identify and design a maintenance service package to meet your exclusive needs Depending on your requirements, Our ISO consultant can work on your system on a weekly, monthly, quarterly or annual basis on nominal cost as compared to full time internal auditor or Quality professional.

Outsourcing the maintenance of your ISO Management System provides:

- A significant cost-saving solution maintenance of your ISO Management System by highly trained ISO consultant irrespective of size of an organization
- Reducing business risk and improve your business performance
- Becoming more sustainable
- In a global economy of rapidly emerging new technologies and markets, standards help set the rules and establish the frameworks, making it easier to innovate successfully.
- Success is all about how you perform at every level of your organization. ISO standards promote a culture of continual improvement.

How it will work?

ABS Business Consulting will assign a dynamic professional ISO consultant who will work with you on an on-going basis to assist you in the execution and maintenance of your ISO management system. The Consultant will ensure that your documented processes and procedures are followed and appropriate records are maintained in accordance with the requirements of your management system.

How much does it cost?

The cost will be decide as per the requirement prior to agree it will cost you much less than the full time internal auditor and/or Quality professionals
A payment plan will be agreed to suit your individual requirements
"Generally it will cost you one third of the internal auditor annual salary and it is exclusively depend upon the size of the organization"

Outsourced vs Co-Sourced Internal Audits

Outsourced		Co-Sourced
	RESPONSIBILITY	
You hand over the reigns to an outside team who performs these tasks on a daily basis.		You rely on the expertise of an auditing firm while still participating.
	THE SAVINGS	
Savings can range between 20 and 40% due to experience, efficiency and allowing your team to stay on task.		Saves your organisation far greater than hiring a permanent specialist, but still takes time from your internal team.
	REPORTING	
You can maintain a completely objective perspective with this method.		While it's still easy to remain objective, team member have to respect boundaries.

CORPORATE TRAINING

Our training programs are designed specially to handle the organizational personnel development and job-oriented competence enhancement to bring out the best talent from your team. Our training programs are 100% customized to the specific needs of your organization. They are exhaustive yet delivered in the simplest methodology and are full of interactions that consist of class presentations, mock audits, assignments, role play, examinations, etc.
